**Subject:** Important Matter Regarding R. Norman Harden MD

**Dear Dr. Walsh:**

***The International Research Foundation for RSD / CRPS has become aware of important issues that warrant your attention.***

***We believe the facts as we have documented them at the following site demonstrate that R. Norman Harden MD conducted research on human subjects without required approvals and that the published results were based in part on falsified or fabricated data.***

***In the interests of public safety and scientific integrity, our organization urges that Northwestern University investigate the research that was conducted by Dr. Harden at your institution.***
